VOLUME 41 SECOND SERIES

CONTENTS

JULY 1, 1932

Reflecting and Resolving Power of Calcite for X-Rays – SAMUEL K. ALLISON 1
Scattering of X-Rays by Gases and Crystals – Y. H. WOO 21
Ionization of Air by γ-Rays as a Function of Pressure and Collecting Field – I. S. BOWEN 24
Search for Isotopes of Hydrogen and Helium – WALKER BLEAKNEY 32
Elastic and Inelastic Electron Scattering in Hydrogen – A. L. HUGHES AND J. H. MCMILLEN 39
Electronic Structures of Polyatomic Molecules and Valence. II. General Considerations – ROBERT S. MULLIKEN 49
Evidence of Space Quantization of Atoms upon Impact – H. KUHN AND O. OLDENBERG 72
Equation of State of a Non-ideal Einstein-Bose or Fermi-Dirac Gas – G. E. UHLENBECK AND L. GROPPER 79
On Ferromagnetism and Related Problems of the Theory of Electrons – PAUL S. EPSTEIN 91
Errata:
Shape of an X-Ray Line – ARCHER HOYT 110
Letters to the Editor – 111
Vapour Pressure of Sulphur at 50°C – R. R. H. BROWN AND J. J. MUIR 111
Variation of the Cosmic Rays with Latitude – ARTHUR H. COMPTON 111
On the Production of Ultra-short Electromagnetic Waves – AMEDEO GIACOMINI 113
Predissociation in Nitrogen – JOSEPH KAPLAN 114
Isotopic Weight of H^2 – KENNETH T. BAINBRIDGE 115
Book Reviews – 116

JULY 15, 1932

Diurnal Variation of Cosmic Rays – R. D. BENNETT, J. C. STEARNS AND A. H. COMPTON 119
Diffuse Scattering of X-Rays from Sodium Fluoride – G. E. M. JAUNCEY AND P. S. WILLIAMS 127
Very Soft X-Ray Spectra of Heavy Elements – C. DEL ROSARIO 136
On the Relative Abundances of the Nitrogen and Oxygen Isotopes – GEORGE M. MURPHY AND HAROLD C. UREY 141
Mass-Spectrograph Study of the Ionization and Dissociation by Electron Impact of Benzene and Carbon Bisulfide – ERNEST G. LINDER 149
Elastic Electron Scattering in Helium – A. L. HUGHES, J. H. MCMILLEN AND G. M. WEBB 154
Infrared Dispersion of Carbon Dioxide – HUGH M. SMALLWOOD 164
Band Spectrum of Sulphur Monoxide – EMMETT V. MARTIN 167
Influence of Crystalline Fields on the Susceptibilities of Salts of Paramagnetic Ions. I. The Rare Earths, Especially Pr and Nd – WILLIAM G. PENNEY AND ROBERT SCHLAPP 194
Theory of the Variations in Paramagnetic Anisotropy among Different Salts of the Iron Group – J. H. VAN VLECK 208
Investigations in the Field of the Ultra-short Electromagnetic Waves. IV. On the Dependence of the Ultra-short Electromagnetic Waves upon the Heating Current and upon the Amplitude of the Oscillations – G. POTAPENKO 216
Hall Effect with Audiofrequency Currents – LAWRENCE A. WOOD 231
Some Thermo- and Galvanomagnetic Properties of a Bismuth Crystal – H. E. BANTA 239
Does Nickel Show a Positive Elongation in the Joule Magnetostrictive Effect? – S. R. WILLIAMS 251
Letters to the Editor – 254
Electronic Structure of the a-X Band System of N_2 – E. T. S. APPLEYARD 254
Deposition of Chromium on Glass – ROBLEY C. WILLIAMS 255
Note on Molecular Structure – JOHN C. SLATER 255
Book Reviews – 258
Proceedings of the American Physical Society: – 261
PULLMAN MEETING, June 17–18, 1932; Minutes and Abstracts 1–15, Author Index

AUGUST 1, 1932

On the Effect of a Secondary Structure upon the Interference of X-Rays – H. M. EVJEN 265
Analysis of the (0, 0) $^2\Pi \rightarrow {}^2\Sigma$ CN Band at 9168A – ALLAN E. PARKER 274
Dirac Electron in Simple Fields – MILTON S. PLESSET 278
Infrared Absorption Spectrum of Carbon Dioxide – P. E. MARTIN AND E. F. BARKER 291
Vibrational Levels of Linear Symmetrical Triatomic Molecules – DAVID M. DENNISON 304
Two-Minima Problem and the Ammonia Molecule – DAVID M. DENNISON AND G. E. UHLENBECK 313
Nuclear Moment of Barium as Determined from the Hyperfine Structure of the Ba II Lines – P. GERALD KRUGER, R. C. GIBBS AND R. C. WILLIAMS 322
Elimination of One Boundary Condition for a Sphere in Radiative Equilibrium by a Layer in Adiabatic Equilibrium – HERMAN ROTH 327
Magnetic Susceptibilities of Alpha- and Beta-Manganese – MARY A. WHEELER 331
Magnetic Susceptibility of Nitrogen Dioxide – GLENN G. HAVENS 337
Barkhausen Effect. III. Nature of Change of Magnetization in Elementary Domains – RICHARD M. BOZORTH AND JOY F. DILLINGER 345
Variation with Temperature of the Thermoelectric Power of Nickel and Some Copper-Nickel Alloys – K. E. GREW 356
Diamond Windows for Withstanding Very High Pressures – THOS. C. POULTER AND FRANCIS BUCKLEY 364
Effect of Pressure on the Index of Refraction of Paraffin Oil and Glycerine – THOS C. POULTER, CARTER RITCHEY AND CARL A. BENZ 366
Letters to the Editor – 368

Probable Values of e, h, e/m and α.—A Reply to R. T. Birge – W. N. BOND 368
Relation of Relative Humidity to the Absorption of Supersonic Waves in Various Mixtures of CO_2 – HENRY H. ROGERS 369
Constants of the N_2O Molecule – E. F. BARKER 369
Raman Effect of Methyl Acetylene – GEO. GLOCKLER AND H. M. DAVIS 370
Structure of Atomic Nuclei – JAMES H. BARTLETT, JR. 370
Becquerel Effect as a Special Case of the Barrier-Layer Photoelectric Cell – R. H. MÜLLER AND A. SPECTOR 371
Note on the Hyperfine Structure of Beryllium Lines – P. GERALD KRUGER AND R. C. WAGNER 373
Newton's Rings in Transparent Metallic Films – J. B. NATHANSON 373
Total Secondary Electron Emission from Metal Faces – S. RAMACHANDRA RAO 374
Theory of the Ozone of the Lower Atmosphere and its Relation to the General Problem of Atmospheric Ozone – OLIVER R. WULF 375
Raman Spectra of Two Liquid Phases of Nitrobenzene – A. M. THORNE AND P. L. BAYLEY 376
New Band System of Barium Hydride in the Infrared – WILLIAM W. WATSON 377
Zeeman Effect and Perturbations in the CO Angstrom and the N_2^+ Bands – WILLIAM W. WATSON 378
Rôle of Gas Adsorption in Counting Chambers – L. F. CURTISS 379

Book Reviews – 380
Proceedings of the American Physical Society: – 384

NEW HAVEN MEETING, June 23–25, 1932; Minutes and Abstracts 1–50, Author Index

AUGUST 15, 1932

Energies of Cosmic-Ray Particles – CARL D. ANDERSON 405
Scattering of X-Rays from Solids – ALLEN W. COVEN 422
Sum Rules for Atomic Transition Probabilities – J. P. VINTI 432
Multiplet Splitting and Intensities of Intercombination Lines. Part I. – HUGH C. WOLFE 443
Isotope Shift in Hyperfine Structure – JENNY E. ROSENTHAL AND G. BREIT 459
Isotope Separations in the Infrared Absorption Spectrum of HCl and the Possible Existence of a Chlorine Isotope of Mass 39 – J. D. HARDY AND G. B. B. M. SUTHERLAND 471
Spectra of Na II, III and IV in the Extreme Ultraviolet – BRUCE B. VANCE 480
Absorption Spectrum of Benzene in the Region of 6.75μ – S. SILVERMAN 486
Theory of the Faraday Effect in Molecules – ROBERT SERBER 489
Experiments on the Nature of Ferromagnetism – FRANCIS BITTER 507
Thermoelectric Power of Single Crystal Bismuth near the Melting Point – ADOLF SOROOS 516
Acoustic Resonator Interferometer: II. Ultrasonic Velocity and Absorption in Gases – J. C. HUBBARD 523
Mutual Impedance of Grounded Wires above the Surface of the Earth – RONALD M. FOSTER 536
Letters to the Editor – 538

Frequency of Resonance Radiation – S. A. KORFF 538
Use of Argon in the Ionization Method of Measuring Cosmic Rays – ARTHUR H. COMPTON AND JOHN J. HOPFIELD 539
Strain and Magnetic Orientation – LEWI TONKS AND K. J. SIXTUS 539
Electrons as Cosmic Rays – W. F. G. SWANN 540

Book Reviews – 543

SEPTEMBER 1, 1932

Interpretation of Cosmic-Ray Phenomena – THOMAS H. JOHNSON 545
Design of a Double-Crystal X-Ray Vacuum Spectrometer – LYMAN G. PARRATT 553
X-Ray Diffraction from Calcite for Wave-Lengths 1.5 to 5 Angstroms – LYMAN G. PARRATT 561
Survey of the *K*-Satellites – O. REX FORD 577
Series and Term Values in the Arc Spectrum of Tellurium – J. E. RUEDY 588
Resonance Fluorescence of Benzene – G. B. KISTIAKOWSKY AND M. NELLES 595
Ionization of Neon and Argon by Positive Alkali Ions of Energies from 650 to 2000 Volts – J. CARLISLE MOUZON 605
Photoelectric Properties of Alkali Metal Films as a Function of their Thickness – JAMES J. BRADY 613
Optical Dissociation of Iodine and Enhancement of Predissociation by Collisions – LOUIS A. TURNER 627
Reflection of Thallium, Lead and Antimony Atoms from Sodium Chloride Crystals – J. M. B. KELLOGG 635
Electrical Resistance and the Critical Point of Mercury – FRANCIS BIRCH 641
Bearing of the Earth's Internal Magnetic Permeability upon the Self- and Mutual Inductance by Coils Wound on its Surface – W. F. G. SWANN 649
Value of the Townsend Coefficient for Ionization by Collision at Large Plate Distances and Near Atmospheric Pressure – FREDERICK H. SANDERS 667
Letters to the Editor – 678

Experimental Evidence for and Determination of the Predicted $^1\Delta$ Level of the Neutral Oxygen Molecule – BERNARD LEWIS AND GUENTHER VON ELBE 678
Remark on Erikson's Measurements of the Ionization by γ-Rays at Various Pressures and Potentials – H. ZANSTRA AND J. CLAY 679
Dependence of the Ionization Produced by γ-rays upon Pressure and Temperature – NEWELL S. GINGRICH 679
Progress of Cosmic-Ray Survey – ARTHUR H. COMPTON 681
Diurnal Variation of Cosmic Rays and Terrestrial Magnetism – ROSS GUNN 683
Spin of the Neutron – R. F. BACHER AND E. U. CONDON 683
Electron Affinity of Hydrogen – GEORGE GLOCKLER 685
Equilibrium between Positive Ions and Neutral Atoms in Positive Rays of the Rare Gases – HAROLD F. BATHO 686
Radiation from Moving Helium, Neon and Argon Ions – A. I. MCPHERSON 686
Some Evidence Indicating a Removal of Positive Ions from Cold Surfaces by Electric Fields – J. W. BEAMS 687
Reflecting and Resolving Power of Calcite for X-Rays – SAMUEL K. ALLISON 688
Variation of the Cosmic-Ray Intensity with Azimuth – THOMAS H. JOHNSON AND J. C. STREET 690

Book Review – 691

SEPTEMBER 15, 1932

Faraday Effect with X-Rays – DAROL K. FROMAN 693
New Measurements of the Ranges of Alpha-Particles from Polonium, Uranium I and Uranium II with the Wilson Chamber – F. N. D. KURIE 701
Relativistic Thomas-Fermi Atom – M. S. VALLARTA AND N. ROSEN 708
Wentzel-Brillouin-Kramers Method of Solving the Wave Equation – J. L. DUNHAM 713
Energy Levels of a Rotating Vibrator – J. L. DUNHAM 721
Rotational Analysis of Some CO_2 Emission Bands. Part I. – R. F. SCHMID 732
Electronic Structures of Polyatomic Molecules and Valence. III. Quantum Theory of the Double Bond – ROBERT S. MULLIKEN 751
Production of Infrared Spectra with Electric Fields – E. U. CONDON 759
Impacts of Fast Electrons and Magnetic Neutrons – J. F. CARLSON AND J. R. OPPENHEIMER 763
Photoelectric and Thermionic Emission from Composite Surfaces – WAYNE B. NOTTINGHAM 793
Relation between the Electric and Diamagnetic Susceptibilities of Monatomic Gases J. P. VINTI 813
Variation of the Principal Magnetic Susceptibilities of Certain Paramagnetic Crystals with Temperature – B. W. BARTLETT 818
Supersonic Dispersion and Absorption in CO_2 – W. H. PIELEMEIER 833
Letters to the Editor – 838

Angular Distribution of Elastically Scattered Electrons in Mercury Vapour – F. L. ARNOT 838
Lower Limit for the Ground State of the Helium Atom – D. H. WEINSTEIN 839

Book Review – 840
Author Index to Volume 41 – 841
Analytic Subject Index to Volume 41 – 846
